<p&gt;&lt;/p&gt;&lt;p&gt;The TL;DR version of this review is: surprising ligh
t, extremely pocketable, does the job, not my dream charger but at 🔑 th
e price it s well worth it.</p&gt;
           ve covered a product of Lepow s before, the Moonstone. Like the Moon
<p&gt;We
stone, the Poki comes 🔑 with a cloth carrying case that you can stash a
USB cable in (it appears to come with a 6 ‡ 🔑 USB-> MicroUSB,) or ch
uck your ID and credit card in and use it as a wallet while you re out. It
28273; actually the first thing that stood out when I was looking at the device
. The Moonstone is still going strong 🔑 with a friend of mine a year la
ter.</p&gt;
<p&gt;The battery delivers a 90% conversion efficiency rating according to sp
ecs on the 🔑 manufacturer s website. Most batteries go from the high 70
  s to mid 80 s. You want to see a higher number as 🔑 this is how much p
ower gets delivered with the rest being lost in conversion.</p&gt;
<p&gt;The Poki can charge and recharge at &#128273; 2.1amps. This means you
re not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you
should 🔑 be able to charge this in under five hours and with 90% conve
rsion efficiency you should have around 9000mAh of 🔑 actual juice to sp
```

are. That should be enough for at least three complete charges from dead to full

<p&gt;2.1 amp charging also means you re not going to spend ~7 hours charging a 3000mA phone &#128273; from dead, more like an hour and a half if your phone

for any 🔑 smartphone on the market today.</p&gt;
